```

```
a >= b
```

```
True
```

```
continue_program = False  
  
continue_program == True  
  
if continue_program:  
    print("Cool!")  
else:  
    print("Ok, bye :-(")
```

Assignment

```
continue_program = False
```

```
continue_program == True
```

Comparison

```
if continue_program:  
    print("Cool!")  
else:  
    print("Ok, bye :-(")
```

```
continue_program = False
```

```
continue_program == True
```

```
if continue_program:
```

```
    print("Cool!")
```

```
else:
```

```
    print("Ok, bye :-(")
```

Comparison  
to True is  
unnecessary

Code before if-statement

if condition
